

Find a Recycling Location near You

Contact: Steve Noble 517-284-6589

Agency: Environmental Quality

The ***Michigan Recycling Directory*** provides residents and businesses with an easy-to-use system to get information about recycling opportunities within their communities and regions. The system allows people to search for recycling location near them; search for locations to recycle a specific material; do a general search for any recycling location within a geographic region.

This easy-to-search format allows individuals looking for recycling opportunities with the ability to identify the best location for the material they wish to recycle. Using the built in search functions, the individual will obtain a list of locations providing the desired service(s) in their area, the physical location, contact information, hours and other pertinent information.

Start your search by clicking on this link: [Where can I recycle?](#)
